8.2 APPENDIX-B: DEMO SCREENSHOTS

Fig: 8.1 GradeX Website

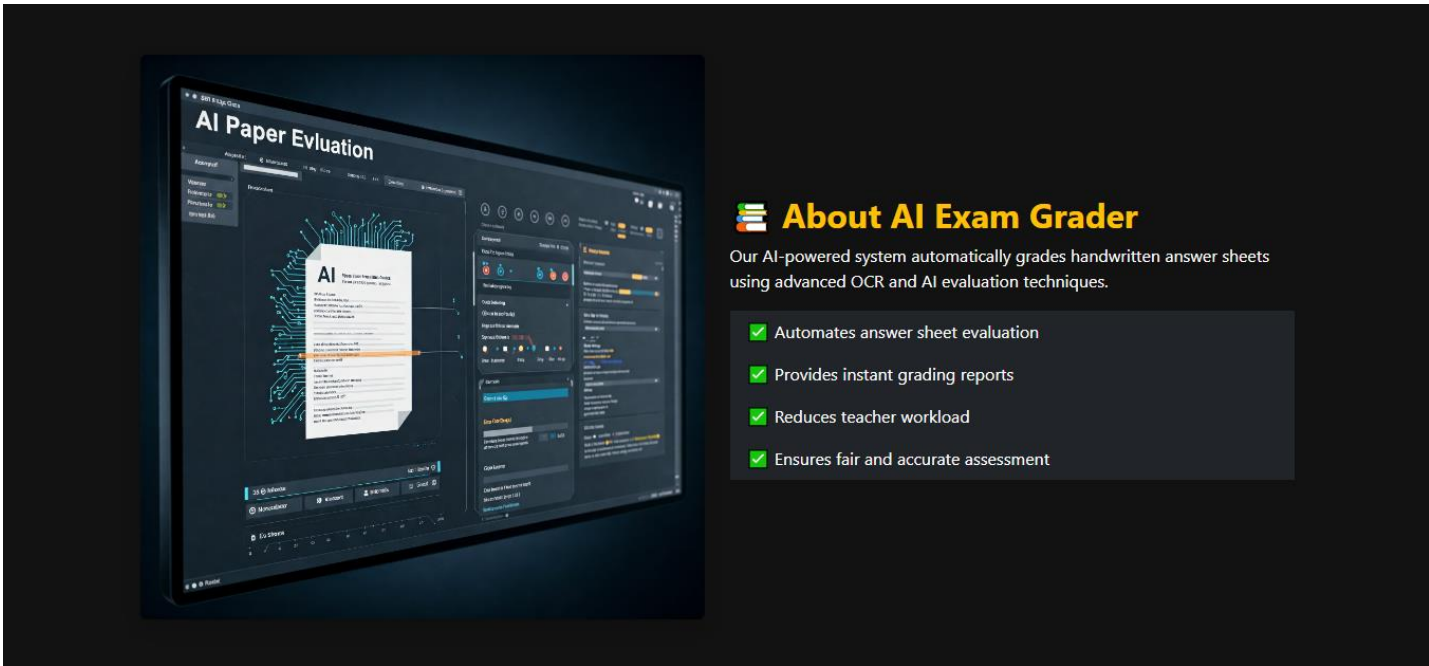

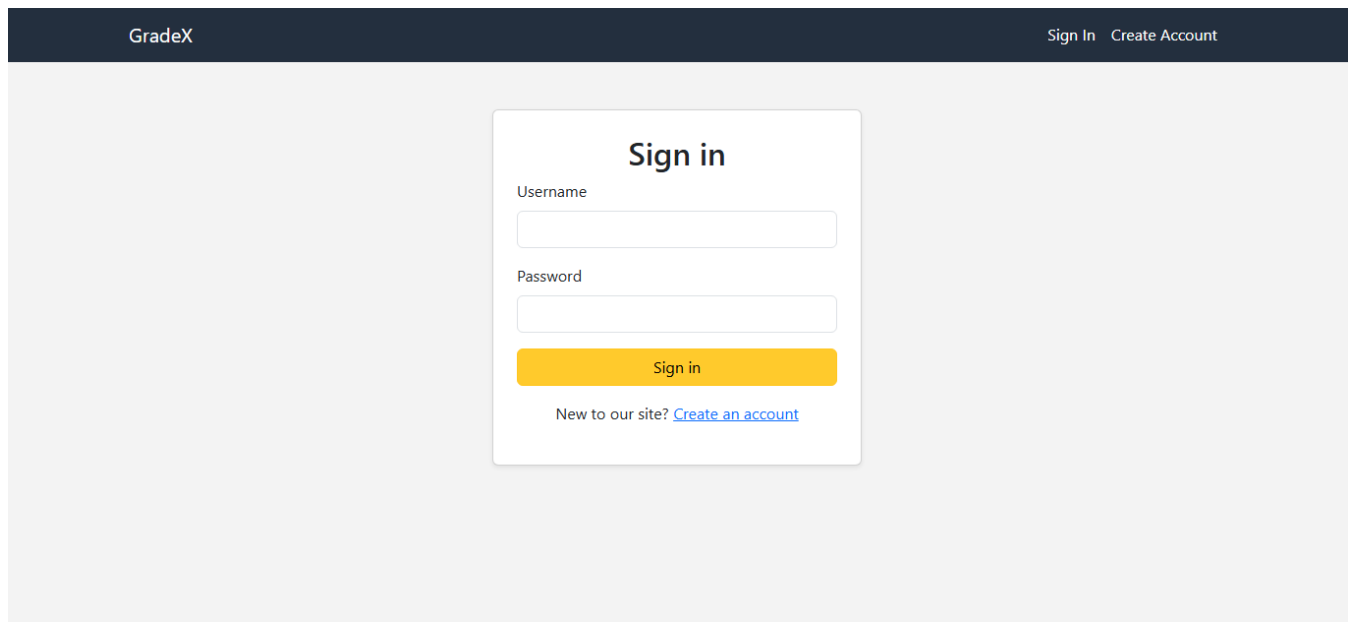

Fig: 8.2 GradeX Information

The image shows a web page for GradeX with a dark blue header. The header contains the text "GradeX" on the left and "Sign In Create Account" on the right. The main content area is light gray and features a white "Sign in" form. The form has a title "Sign in", a "Username" label with a text input field, a "Password" label with a text input field, a yellow "Sign in" button, and a link "New to our site? [Create an account](#)".

Fig: 8.4 Gradex Student Sign up

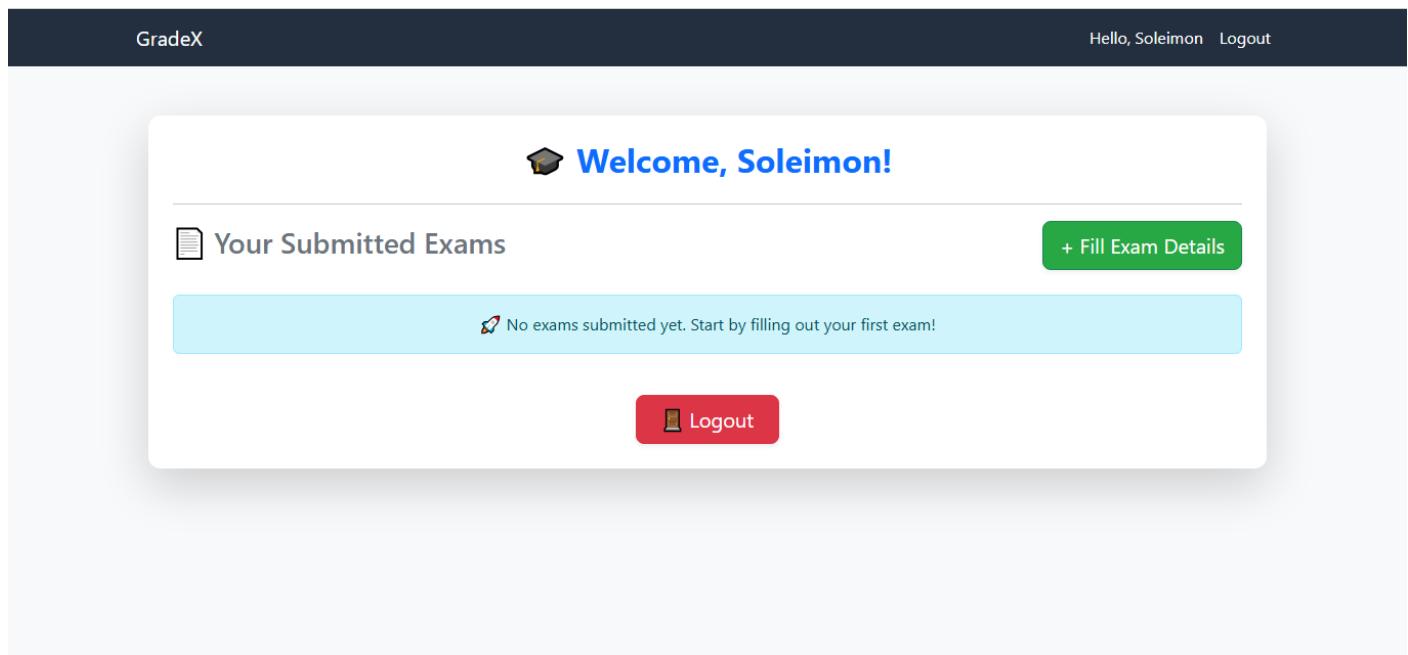

Fig: 8.5 Gradex Student Dashboard

The screenshot shows the GradeX Student Exam Fill form. At the top, a dark blue header contains the text "GradeX" on the left and "Hello, Soleimon Logout" on the right. The main content area is white and features a central card. The card has a blue header with a pencil icon and the text "Fill Exam Details". Below this, there is a green box with the text "Login successful!". The form contains four input fields: "Subject Name" with the value "Chemistry", "Exam Type" with a dropdown menu showing "CAT 1", "Year" with a dropdown menu showing "Fourth Year", and "Staff Name" with the value "Walter White". At the bottom of the card is a green button labeled "Submit Exam Details" with a checkmark icon.

 Student Name: kumar

Roll Number: 2

 Year: 4

Q.No	Question	Student Answer	Correct Answer	Marks Awarded	Max Marks	Evaluation
Q1	Define Margin Market	⦿ margin money. The initial deposit required by Lender or financial institution to allow the borrowing of funds for investment, typically used in stock trading.	◆ Answer: Margin money is a percentage of the total transaction value that a borrower is required to pay upfront when taking a loan or making an investment.	2	2	The student's answer correctly defines margin money as an initial deposit required for borrowing funds for investment.
Q2	Define equity funding	⦿ Equity funding Raising Capital by chasing shares of the company to investors in exchange for ownership This can include personal savings angel investors or public stock offering	◆ Answer: Raising capital by selling company stock (ownership shares). Investors provide funds in exchange for equity, becoming part-owners with a claim on future profits.	2	2	The student's answer correctly defines equity funding as raising capital by selling shares for

		<p>association (AOA), and other forms required by the company registrar. These documents outline the company's operations and governance structure. iv. REGISTER WITH THE RELEVANT AUTHORITY: In many countries, businesses need to be registered with a government body like the Companies House, the Ministry of Corporate Affairs or the Sec. This typically involves submitting your documents and paying a registration fee. v. OBTAIN LICENSES AND PERMITS: Depending on the business type, you may need additional licenses Eg for health, safety or food businesses vi. REGISTER FOR TAXES: The company must be registered for tax purposes (Eg, getting a tax identification number or registering for VAT, depending on local laws) vii. OPEN A BANK ACCOUNT: After the company is registered, you'll likely need to open a corporate bank account to manage finances. viii. COMPLY WITH POST-REGISTRATION. REQUIREMENTS After registration, there may be ongoing compliance requirements, such as annual filings, audits or maintaining a registered office. The specific steps may differ based on the jurisdiction, so it's important to refer to the local legal and regulatory authorities when starting the registration process.</p>	<p>company's objectives and structure. 2. Articles of Association (AoA): Rules and regulations for company management. 3. Director Identification Number (DIN): Required for company directors. 4. Digital Signature Certificate (DSC): Used for online registration and filing. 5. Address Proof & Identity Proof: Documents such as Aadhar card, passport, or electricity bill. Step 4: Register with Government Authorities • Apply for registration with the Ministry of Corporate Affairs (MCA) or relevant authority in your country. • Submit the required forms and pay the registration fee. Step 5: Obtain Business Licenses & Permits Depending on the industry, additional licenses may be required: • GST/VAT registration (for tax purposes). • Trade licenses for retail businesses. • Industry-specific permits (e.g., food safety for restaurants). Step 6: Open a Business Bank Account • A corporate bank account is necessary for financial transactions. • Required documents: Registration certificate, PAN (if applicable), and identity proofs. Step 7: Register for Taxes • Tax Identification Number (TIN)/Goods & Services Tax (GST): For tax compliance. • Employer Identification Number (EIN): If hiring employees. Step 8: Compliance & Annual Filings • Companies must follow compliance requirements such as: ○ Annual financial statements submission. ○ Tax return filings. ○ Holding annual general meetings (AGM) for shareholders. Conclusion Registering a company legally establishes it, providing credibility, limited liability protection, and access to funding. Proper documentation and adherence to legal regulations ensure smooth business operations.</p>

CHAPTER 9

CONCLUSION

The Gradex System represents a significant advancement in the automation of academic answer sheet evaluation. By integrating state-of-the-art technologies such as Tesseract OCR for text extraction, Ollama 3.1 for intelligent text refinement, and BERT for deep semantic understanding, the system provides a reliable, efficient, and scalable solution to a traditionally time-consuming process.

This system not only accelerates the evaluation process but also ensures fairness and consistency in grading by reducing human bias and manual errors. Teachers benefit from detailed performance reports, customizable exam management, and the ability to override AI evaluations when necessary, ensuring full transparency and control. Students gain access to timely feedback and structured performance tracking, promoting continuous learning and improvement.

The experimental results affirm the system's capability to deliver high accuracy in grading, user-friendly interfaces, and seamless dashboard experiences for both teachers and students. Overall, Gradex stands as a transformative tool in the field of education, helping institutions adopt smarter, AI-powered methods for academic assessment.

CHAPTER 10

FUTURE ENHANCEMENTS

While the Gradex system has successfully streamlined the process of evaluating handwritten student answer sheets using OCR and AI, the current workflow still requires manual scanning or photographing of the answer sheets before processing. A major area for improvement lies in automating this input step to make the system more seamless and scalable.

The primary future enhancement will focus on digitizing the answer sheet collection process. Instead of manually scanning or converting student-written sheets into PDFs or image formats, the system can be integrated with school digital infrastructure to automatically ingest answer sheets directly from:

- **Smart exam papers** written on digital pads or tablets with stylus input
- **Mobile app-based capture systems** where teachers simply click pictures, and the app auto-converts and uploads them to the backend
- **Scanner integration APIs** that trigger evaluation as soon as papers are scanned

This would eliminate delays, reduce human effort, and improve the overall efficiency of the system from input to evaluation.

In addition to this, several other enhancements are planned for the Gradex platform:

- **Multilingual Answer Sheet Support**
Expanding OCR and NLP capabilities to evaluate responses written in regional languages.

- **Real-time Evaluation via Digital Input Devices**

Supporting direct writing on tablets to allow instant feedback and auto-evaluation.

- **Learning Feedback Loop for Scoring Adjustment**

Using machine learning models to learn from teacher corrections and adapt future scoring.

- **Advanced Student Performance Analytics**

Generating detailed reports with topic-wise analytics, progress tracking, and feedback suggestions.

- **Plagiarism Detection**

Adding modules to detect similar or copied content between students' answers.

- **LMS and Mobile Integration**

Integrating with Learning Management Systems (LMS) and offering mobile apps for easy access by both students and teachers.

By focusing on automating the initial input step, Gradex will not only become more efficient but also truly scalable for large-scale educational deployments.

CONFERENCE CERTIFICATES

CERTIFICATE OF APPRECIATION

This is to certify that Mr.A.Mohamad Asick, Kings College of Engineering,
has presented a paper entitled on AI-Powered Answer Sheet Evaluation Using OCR and Large Language Models for Automated
Grading in International Conference on
“Sustainable Innovations in Management, Technology & Advanced Computing-SIMTAC'25” in
association with SEGi University, KL, Malaysia organized by **School of Management Studies &**
School of Computer Applications, on **4th April 2025** at **Karpagam College of Engineering,**
Coimbatore.
